

Hanwha Surfaces Technical Bulletin

HXTB-3
05.31.05

At Hanwha Surfaces, we continue to strive in providing innovative products and excellence in customer service. To provide Hanex® 100% Acrylic Solid Surface customers with the highest satisfaction of their choice, this Technical Bulletin is posted to ensure that customers' expectations are met.

At Hanwha Surfaces, development of New Colors and Patterns are just some of the things we do to continue to cater to the needs of our customers with regard to each individual's specific needs.

The basic composition of all Hanex® 100% Acrylic Solid Surface is the same, however, it is important to understand that certain dark or heavily pigmented colors, and special design patterns are not recommended for certain use. Since these colors are more likely to show scratches, dusts, haziness, and other ordinary wear and tear compared to the lighter, textured colors, it is recommended that customers use caution when choosing colors especially from the following list. This is especially recommended if the material were to be installed in areas of heavy usage and contact, such as kitchen work surface, desk, reception counter, etc.

All Hanex® 100% Acrylic Solid Surface products are developed to provide surfacing capabilities like no other. Even though the basic composition remains the same, the overall pigmentation may differ and some colors can have higher density of pigments necessary to produce such beauty and texture.

The following colors are not recommended for use in residential or commercial application that are subject to heavy use, due to its frequent care and maintenance requirements needed to keep their appearance. It is important to note that this recommendation is for the purpose of voluntary notification of frequent care and maintenance requirements on following colors.

PINETREE	PURPLE	SANDCOPPER
NAVYBLUE	BLUEWAVE	BLACKBURN
NOBLEGREEN	INDIGOBLUE	PEARLBLACK

Please Note:

- Hanex® 15 Years Limited Warranty does not cover against Minor conditions such as scratches, stains, water spots, and burns, which may be corrected by HANEX® care & maintenance instructions/guidelines or customer expectation issue.
- This list will be updated periodically as we launch new colors and designs.

This Technical Bulletin is designed to provide support in fabrication, installation, and/or to ensure performance of Hanex® 100% Acrylic Solid Surface product. Though the information contained in this bulletin has been tested and is deemed reliable, each person or persons should perform individual test to make sure the information contained in this bulletin works for each application. None of the contents, including but not limited to the instructions, recommendations, graphics, techniques, and guidelines should be understood as implying of legal, warranty, or any type of liability by Hanwha Surfaces and its affiliates. Any information or recommendation herein is strictly for the purpose of reference and Hanwha Surfaces and its affiliates assume no responsibility for its suitability or accuracy for products other than Hanex® solid surfaces.
